TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C/C++, SQL, HTML/CSS

Frameworks: FastAPI, Node.js, Express.js, Three.js, React Three Fiber, React, SQLAlchemy, Alembic

Tools: PostgreSQL, MongoDB, Redis, Docker, Git, Linux, Bash, GCP, Vite, Vercel, Render

PROJECTS

Maps — AI Travel Planner

StormForge 2026

- Implemented **40+ FastAPI REST endpoints** backed by PostgreSQL for an AI-powered travel planning platform
- Designed and built an AI itinerary pipeline using OpenAI and Google Places to generate personalized travel plans
- Modeled PostgreSQL schemas with SQLAlchemy and Alembic to support **3-level** trip collaboration
- Optimized API performance with **Redis caching** using 30-minute to 24-hour TTLs
- Implemented **role-based authorization** supporting owner, editor, and viewer access to shared trips
- Containerized backend with Docker and deployed to Google Cloud Run for scalable development
- Developed backend APIs, database schemas, and third-party integrations within a 4-person Agile team

Prioritize

Sep 2025 – Dec 2025

- Implemented **15+ FastAPI REST endpoints** backed by PostgreSQL for task management and smart scheduling
- Implemented JWT authentication with bcrypt to support secure multi-user access and protected API endpoints
- Modeled PostgreSQL schemas using SQLAlchemy and Alembic for reliable data persistence and database migrations
- Built a weighted scheduling engine that automatically prioritized tasks using deadlines, difficulty, and grade weight
- Integrated Google Calendar API and ICS export for seamless calendar synchronization
- Developed Redis-backed event logging APIs to support real-time user activity analytics
- Contributed backend services, database design, and frontend integration within a 5-person Agile team

Sweat Market

Hackathon — Sept 2025

- Built a full-stack social fitness platform that connects users with workout partners and rewards verified workouts
- Developed backend REST APIs using Node.js and Express for authentication, user profiles and social interactions
- Implemented QR code-based workout check-ins to verify shared fitness sessions and support in-app reward workflows
- Validated REST API endpoints and edge cases using Postman, identifying integration issues and improving reliability
- Collaborated in a fast-paced hackathon environment to deliver a functional MVP within 24 hours

EDUCATION

Simon Fraser University

Bachelor of Science (BSc), Computer Science

Burnaby, BC

Aug. 2022 – Present

EXPERIENCE

Barista

Dec 2024 – Present

Paris Baguette

Burnaby, BC

- Delivered accurate, high-quality service in a fast-paced environment while managing multiple customer orders
- Collaborated with teammates during peak hours to maintain efficient workflow and consistent customer experience
- Demonstrated reliability through consistent scheduling, adaptability, and long-term commitment

Math Tutor

Sept 2024 – Dec 2025

Private Tutor

Coquitlam, BC

- Explained complex mathematical concepts through clear, structured problem-solving approaches
- Adapted explanations to different learning styles to improve student understanding and confidence
- Prepared personalized practice problems and study plans to reinforce learning and track student progress

Barista & Server

Sept 2023 – Sept 2024

Ibex Cafe + Kitchen

Coquitlam, BC

- Managed multiple concurrent customer requests while maintaining accuracy in a fast-paced environment
- Communicated effectively with teammates to coordinate timely service during high-volume periods
- Adapted quickly to changing priorities while maintaining consistent service quality
